

Physics 12 Section 20-7
Definition of the Ampere and the Coulomb

1. The Ampere is defined as

$$F_1 = \frac{\mu_0 I_2 I_1 l}{2 \pi r}$$

$$\frac{F_1}{l} = \frac{(4\pi \times 10^{-7}\text{ Tm/A}) \times (1\text{ A}) \times (1\text{ A})}{2 \pi \times 1\text{ m}}$$

$$\frac{F}{l} = 2 \times 10^{-7}\text{ N/m}$$

2. The definition of the Coulomb follows from the definition of the Ampere.
